

## Flagpole Sharjah

AO Lighting installs lighting system at Sharjah flagpole, UAE

Photos © AO Lighting

■ In December 2012, the United Arab Emirates celebrated its 41st National Day. To mark the occasion, the emirate of Sharjah erected its own giant flagpole. It was a project to which the highest priority had been accorded. Now the 123-metre flagpole is illuminated by a fixed installation comprising AO FALCON STATIC ARC 7,000W and 2,000W architectural floodlights.

AO Lighting was commissioned to provide and program the illumination of the new town's landmark. The lighting design for the Sharjah flagpole as well as its programming was the work of the AO Lighting creative department AO Creative.

With this project, AO Lighting counts one more flagpole to its portfolio, thereunder the currently world's largest flagpole in Dushanbe, Tajikistan, with its height of 165 metres.
